

LARCHAGO

LARCHAGO RIOJA ALAVESA ROSADO

RIOJA ALAVESA • RIOJA • SPAIN • EUROPE

TECHNICAL DETAILS

The Estate

Since 1882, four generations have tended their vineyards and made their own wines here. The winery was the first to be registered as a wine bottler in the Rioja Alavesa sub-area. The most representative brand of our D.O.Ca Rioja wines. Our own vineyards are located in the municipalities of Laguardia, Elciego and Lapuebla de Labarca, the most emblematic areas of the Rioja Alavesa sub-area.

Wine Making

The grapes come from our own vineyards in Rioja Alavesa drylands. They are harvested in the second week of September when they reach their optimum ripeness. This rosé is produced using the technique known as “bleeding”, as part of a classical, refined concept, in order to obtain an uncommonly delicate, smooth, fresh wine. The wine remained in contact with its lees for three months.

Food Suggestions

Pairs well with rich fish such as salmon and tuna, shellfish, spicy food, appetizers and snacks, lean fish, and cured meats.

TASTING NOTES

Attractive strawberry pink color with violet tones of youth. This wine stands out for its great aromatic richness from the characteristic varietal Tempranillo. Dominated by notes of strawberry and raspberry. The palate is very involving with the flavors of strawberry still long and persistent. Very nice pink drink with lots of flavor and vinosity.

100% Tempranillo grape blend.

This wine contains allergens, sulfites.
