

BOJO DO LUAR

2022

## BOJO DO LUAR 'DEU BODE' VINHO VERDE TINTO

VINHO VERDE • PORTUGAL • EUROPE

### TECHNICAL DETAILS

#### The Estate

Savio was undeterred and saw this as an opportunity: to use the traditional autochthonous varietals of Northern Portugal, and apply his knowledge and experience of many decades working with French producers, mainly in Burgundy and Loire.

#### Wine Making

A low-intervention blend of field blend of 70% red varietals and 30% white varietals grown on granitic soils and hand-harvested in early October. The Vinhão and Borraçal are macerated for five days, followed by spontaneous fermentation in stainless steel with all varietals.

#### Food Suggestions

Pairs well with beef, lamb, deer, venison, and poultry dishes.

### TASTING NOTES

It was electric and blue; the Borraçal also had above 9g/l of total acidity and fine red flower aromas; the Bastardo was smokey and spicy in character; the Arinto is the wine with lowest acidity in the group at 6g/l. It adds vibrant zestiness and citrus characteristics, and the Loureiro was the last addition with its perfumed aromatic characteristics and silky texture.

**Vinhão, Bastardo, Borraçal, Arinto, Loureiro grape blend.**

**This wine contains allergens, sulfites.**
