

BOJO DO LUAR

BOJO DO LUAR 'DEU BODE' VINHO VERDE TINTO

VINHO VERDE • PORTUGAL • EUROPE

TECHNICAL DETAILS

The Estate

Savio was undeterred and saw this as an opportunity: to use the traditional autochthonous varieties of Northern Portugal, and apply his knowledge and experience of many decades working with French producers, mainly in Burgundy and Loire.

Wine Making

A low-intervention blend of field blend of 70% red varieties and 30% white varieties grown on granitic soils and hand-harvested in early October. The Vinhão and Borraçal are macerated for five days, followed by spontaneous fermentation in stainless steel with all varieties.

Food Suggestions

Pairs well with beef, lamb, deer, venison, and poultry dishes.

TASTING NOTES

It was electric and blue; the Borraçal also had above 9g/l of total acidity and fine red flower aromas; the Bastardo was smokey and spicy in character; the Arinto is the wine with lowest acidity in the group at 6g/l. It adds vibrant zestiness and citrus characteristics, and the Loureiro was the last addition with its perfumed aromatic characteristics and silky texture.

Vinhão, Bastardo, Borraçal, Arinto, Loureiro grape blend.

This wine contains allergens, sulfites.
