TECHNICAL DETAILS

The Estate

The vineyard is planted on this plateau where it has optimal sunlight and perfect natural drainage. The average age of the vines are thirty years old, they flourish and reach perfection in a limestone clay soil enhanced with sedimentary fragments of flint and chalk. It's this secret alchemy which makes the quality of our 'terroir'.

Wine Making

In this atypical panorama, the vineyard is part of a natural heritage whose biodiversity is a long-standing reality.

Food Suggestions

Pairs well with beef, lamb, deer, venison, and poultry dishes.
