TECHNICAL DETAILS

Estate

The 2022 growing season was defined by mild winter conditions with abundant rainfall that guaranteed generous groundwater resources available for the beginning of the vines' vegetative cycle. Spring was initially cool but continued with temperatures in line with seasonal averages prompting normal bloom and fruit set. Summer weather, relatively hot and dry, ensured normal vine growth and optimal development and ripening of the berries.

Winemaking Harvest

This wine was made with the first grapes that are harvested each year in the first half of September, manual harvesting in small 12 kg boxes, and a further selection of grapes took place prior to pressing. in stainless steel tanks at a controlled temperature.
